

ITEM CONTROL SCHEDULE

Version: **V2.3**

Date: **20/08/2025**

Notes: **updates in line with the publication of the Emergency Standard Components and Mental Health Standard Components, code realignment in for electric clocks from ITCL to ITBU**

A. Purpose of the Item Control Schedule

The AusHFG Item Control Schedule (ICS) lists all the items in the AusHFG item library. AusHFG items include room fabrics, furniture, fittings and equipment found within rooms, services and systems that apply to rooms.

The purpose of the ICS is to assist users within the AusHFG community to:-

- select items with pre-identified, standardised coding and naming when briefing, planning and procuring items for healthcare facilities
- provide a framework for documenting linkages of AusHFG items into other systems - for example, to item coding used by architecture firms or to asset management classifications used by asset operators
- correlate items within the database with objects within the AusHFG Revit file resource

B. Format of the Item Control Schedule

The ICS is a report produced in a searchable excel format from item data held within the AusHFG database. It is designed to be printed in horizontal A3 format.

There are several worksheets within the ICS:

Cover Sheet: this page, and contains introductory information and versioning.

Grouping Sheet: indicates the main groupings and sub groupings under which the items fall.

Structure Sheet: explains the purpose of each data field included in the ICS data sheets, plus sets out coding and naming conventions, abbreviations and approaches to dimensioning.

Additional guidance sheets: provide further guidance for users about conventions used within the AusHFG documentation set

Data Sheets: contains the AusHFG items themselves along with their related data, in separate tabs according to their main grouping.

Data in these sheets have filters applied to them, to allow them to be sorted by data field.

Retired Sheet: contains AusHFG items that are retired.

C. Updates to the Item Control Schedule

This document has been created under the guidance of the AHIA BIM Subgroup.

Updates to the ICS will be made:

- following the publication of any new or amended Standard Components or project resources, if any items are new or amended through this process
- following intermittent review by governance groups within the AHIA organisation

Each update of the ICS will receive a new version number and will be dated. Publication of updates will be notified as a News item on the website and by email to users who have subscribed for AusHFG alerts.

To subscribe for alerts, visit <https://healthfacilityguidelines.com.au/subscribe>

To make suggestions regarding additional items or information that should be included in the ICS, use the "Give Feedback" button on the AusHFG website.

ITEM CONTROL SCHEDULE GROUPING SHEET

Items in the ICS are categorised into main groupings and secondary groupings as follows:

Main code	Main grouping	Sub code	Sub grouping
CL	Ceilings and Cornices	BK	Bulkheads
		CN	Cornice
		FI	Ceiling Finish
		FS	Ceiling Flush Set
		GE	General
		TI	Ceiling Tiled
DO	Doors	FD	Folding
		HI	Hinged
		OP	Operable Walls
		PV	Pivot
		RO	Roller
		RV	Revolving
		SL	Sliding
		SP	Special
		ST	Stacking
EL	Electrical Services	GE	General
		GP	GPOs
		GT	Generators and Transformers
		PR	Protection
		SW	Switches
FI	Fixtures and Fittings	GE	General
		BM	Boards and Mirrors
		DI	Dispensers and Holders
		HR	Hooks, Brackets and Racks
		RT	Rails and Tracks
FL	Floors, Floor Finishes and Skirtings	GE	General
		TI	Tiles
		CP	Carpet
		SK	Skirting
		VY	Floor Vinyl, Linoleum and Rubber
FQ	Furniture and Non-medical Equipment	GE	General
		BS	Domestic Beds and Seating
		CA	Catering and Kitchen Equipment
		CL	Cleaning, Laundry and Linen Services
		DW	Desks and Workstations
		SM	Storage Mobile
		SN	Storage Non-Mobile
		TA	Tables
		WS	Waste Management Services
FS	Fire Services	GE	General
		SP	Suppression
		DE	Detection
HY	Hydraulic Services	GE	General
		BA	Basins, Baths and Sinks
		DR	Drainage
		SH	Showers
		TP	Tapware and Outlets
		WC	Toilet Suites
IT	Information and Communications Services	GE	General
		CL	Clinical Systems and Nurse Call
		AV	Audio Visual equipment
		BU	Building Systems
		IN	Infrastructure Passive
		NE	Networked Equipment
		SE	Security Systems
JO	Joinery	GE	General
		SP	Special Joinery
		DW	Drawers and Drawer Units
		SH	Shelves and Shelving Units
		BE	Benches and Supports
		BH	Bedheads
		CU	Cupboards
		LK	Lockers
		RS	Receptions and Staff Stations
LI	Lighting	GE	General
		FX	Light Fixtures
		PO	Portable Lights

Main code	Main grouping	Sub code	Sub grouping
ME	Mechanical Services	GE	General
		EX	Extract
		SU	Supply
MG	Medical Gas Systems	GE	General
		AS	Gas Outlets
		FP	Flowmeters, Control Panels and Accessories
MI	Medical Imaging Equipment	GE	General
		SP	SPECT-CT and Gamma Camera
		AN	Angiography
		BD	Bone Densitometry
		CC	Cardiac Catheter Laboratory
		CT	CT Scanning
		CY	Cyclotron
		FL	Fluoroscopy
		MM	Mammography
		MO	Mobile Imaging
		MR	MRI Scanning
		OC	OPG and Cone Beam CT
		PT	PET-CT and PET-MRI Scanning
		US	Ultrasound
		XR	General X-ray
MM	Medical and Laboratory Equipment	GE	General
		OP	Operating and Procedure Room Equipment
		SP	Services Pendants, Services Panels and Operating Lights
		BE	Beds and Transport Equipment
		AH	Allied Health Equipment
		DN	Dental Equipment
		HA	High Acuity Equipment
		IC	Infection Control Equipment
		LA	Laboratory Equipment
		MA	Maternal and Infant Equipment
		MT	Mortuary Equipment
		PH	Pharmacy Equipment
		PM	Patient Monitoring
		RA	Radiation Therapy Equipment
		TR	Clinical Trolleys
WI	Windows	OP	Operable
		FX	Fixed
WL	Walls and Wall Finishes	FI	Wall Finish
		GE	General

Main code	Main grouping	Sub code	Sub grouping
AF	Applied Finishes	DFI	Door Finishes
		DPR	Door Protection
		JFI	Joinery Finishes
		WFI	Window Finishes
AH	Applied Hardware	DBL	Door Bolts
		DEC	Door Electronic Controls
		DEL	Door Electronic Locks and Latches
		DHC	Door Hold and Close
		DHG	Door Hinges
		DHP	Door Handles and Plates
		DLL	Door Locks and Latches
		DMO	Door Motorisation
		DSL	Door Seals
		DSS	Door Sensors
		DST	Door Stops
		JHI	Joinery Hinges
		JHN	Joinery Handles
		JLL	Joinery Locks and Latches
		WCV	Window Coverings
		WHC	Window Hardware and Controls
		WSS	Window Sensors

ITEM CONTROL SCHEDULE STRUCTURE SHEET

Each data sheet of items in their main groupings is structured as follows:

Excel Column	Column name	Purpose	Notes
A	Item code	Each item is given a unique alphanumeric code to identify it.	Refer notes below for details on how codes are structured.
B	Item description	The name of each item.	Names are formatted in accordance with the naming convention set out in this document.
C	ICS v1.11 Item Code(s)	The item code used in V1.11 of the ICS.	To assist teams in cross matching items between previous and current versions of the Standard Component documentation.
D	ICS v1.11 Item Description(s)	The item name used in V1.11 of the ICS.	To assist teams in cross matching items between previous and current versions of the Standard Component documentation.
E	Budget group	Identifies a <i>starting point</i> for nominating Group 1, 2 and 3 budget categories for each item.	Project teams should align budget groups as early as possible in the project with the client's preferred procurement methodologies. Refer AusHFG Part F - Implementation. Budget Group 1 = items supplied and fixed by the contractor. These are included in the construction contract. Budget Group 2 = items supplied by the client and fixed by the contractor. These include items that are transferred but require installation by the contractor. Budget Group 3 = items supplied and installed by the client. Budget Group 4 = consumable items purchased and installed by the client outside the capital budget.
F	Responsibility	Identifies a <i>starting point</i> for nominating which consultant discipline is responsible for the item.	ARCH = Architect, ENGG = Engineer, DOOR = Door (Architect), WIND = Window / Glazing (Architect), INDES = Interior Designer
G	In use in Standard Components	Identifies which items are used in currently published Standard Components.	True = in use in one or more currently published Standard Component. No = not in use in any currently published Standard Component.
H	AusHFG Revit Content: Family Name	Identifies the family name of items contained within the AusHFG Revit file.	This is for the purpose of navigating the AusHFG Revit model only. Note that some items in the AusHFG RDS are not modelled, e.g. minor items, optional items.
I	AusHFG Revit Content: Type Name	Identifies the type name of items contained within the AusHFG Revit file.	This is for the purpose of navigating the AusHFG Revit model only. Note that some items in the AusHFG RDS are not modelled, e.g. minor items, optional items.

CODING CONVENTION

The alpha letters that represent the main and secondary groupings are joined to make the first four items in the item code.
After the alpha code, a three digit number provides a unique identifier for the item.

For example:

Main grouping

FL Floors, Floor Finishes and Skirtings

plus secondary grouping

CP Carpet

plus unique item identifier

006 FLOOR FINISH: carpet tiles

generates the code:

FLCP-006 FLOOR FINISH: carpet tiles

NAMING CONVENTION

The main descriptor is written in caps: CUPBOARD

If the main descriptor is followed by further descriptors, a colon is used to separate. Further descriptors are written in lower case (unless an acronym): CUPBOARD: tall OUTLET: MATV

Further descriptors are separated with commas, e.g. CUPBOARD: tall, double door, adj shelves

If finishes are specified in the AusHFG Standard Components, these are placed at the end of the item name: CUPBOARD: tall, double door, adj shelves, laminate finish

ACRONYMS, ABBREVIATIONS & DIMENSIONS

adj = adjustable

c/o = clear opening

c/w = complete with

AFFL = above finished floor level

C = centigrade

nom = nominal

H = high

L = long

W = wide

D = deep

diam = diameter

Where measurements are shown as part of an item description, they are in mm unless otherwise specified: WORKSTATION: straight, adjustable height, 720H nom, 600D x 1000W

All measurements (other than clear openings) are nominal. Clear opening measurements are minimum measurements.

JOINERY ITEM DIMENSIONS

Various joinery types are included in the ICS. Because of the high variability of joinery sizes, set out dimensions are assumed to be included in documentation prepared by the project team, or specified in sets of child items.

As a result, dimensions are not captured in joinery item descriptions, with the exception of benches and bench tops, where the depth of the bench is used as a primary item identifier as this is a functional feature important to users.

Room Layout Sheets can be referred to for overall joinery sizing.

CREATION OF NEW ITEMS

Each sub grouping of the AusHFG item library allows for up to 999 items to be coded. Item codes 001-499 are reserved for AusHFG use.

Project teams choosing to use the AusHFG coding system within a project can create new items using item codes 500-999.

For example:

A project team may be installing an MRI imaging modality with three components that don't currently appear in the AusHFG ICS.

The team can create the items in the MMMI (Medical Imaging) grouping, from code number 500 onwards: MMMI-500, MMMI-501, MMMI-502

ITEM CONTROL SCHEDULE - ADDITIONAL GUIDANCE

OVERVIEW

The AusHFG are a vital starting point for design based on research, clinical, consumer input and other evidence. The documentation conventions it uses support its primary role as a briefing and design tool for the development of healthcare facilities. It is expected that project teams will build on the level of data provided by the AusHFG, to suit project requirements. This guidance sheet provides further detail on the documentation conventions used the AusHFG data set, and provides additional guidance for teams who may choose to use the AusHFG documentation conventions for projects.

ITEM NAMING

The name of each AusHFG item firstly describes what the item is. After this, it describes what it is for or provides more detail about the item.

For example:

FLCP-006 FLOOR FINISH: carpet tiles
 FQTA-091 TABLE: overbed, mobile, height adjustable
 ITNE-071 TELEPHONE: handset, desktop

In some instances, the main item descriptor is further augmented with details important to its function and/or the function of the Standard Component room it is located in. These details include functional, dimensional, locational and finishes details.

Dimensional details

Where dimensional and/or capacity details are important to the functionality of the item or to the Standard Component room the item is used in, those details are included in the item name.

DOORS, in many instances, have clear openings specified for them in the AusHFG Standard Components. These clear openings are derived as part of the clinically moderated processes used to develop the Standard Components, and so are a key performance requirement for many of the door items. Where a clear opening (c/o) for a particular door has been derived, it is included in the item name:

DOOR: hinged, 1 leaf, 950 clear opening, solid, standard vision panel
 DOOR: hinged, 1 1/2 leaves, 1400 clear opening, solid
 DOOR: sliding, bi-parting, 2 leaves, 1600 clear opening, fully glazed, framed

Where critical to spatial planning or function, items have dimensional details specified for them in their name. These dimensional details are nominal and have been included in the item name in mm, often with abbreviations to indicate length, depth, height, etc.:

WORKSTATION: straight, adjustable height, 720H nom, 750D x 1800W
 TABLE: rectangular, 750H, 1500L x 900W
 BENCH: 750D, laminate

Locational details

In some instances, items have locations identified with them (e.g. ceiling mounted, wall mounted). This is to assist users in assessing bracketry or wall strengthening needs, to locate frequently occurring items within complex rooms and to allow create different BIM geometries for each locational variant.

For example, commonly specified BRACKETS for patient entertainment screens are identified as being ceiling or wall mounted:

BRACKET: patient entertainment system, fixed, wall mounted
 BRACKET: patient entertainment system, fixed, joinery mounted
 BRACKET: patient entertainment system, fixed, ceiling mounted

JOINERY and FURNITURE item names identify where the item is under bench, wall mounted, etc. or where there are benchtop, wall mounted, floor standing, mobile, etc. variations of the item

CUPBOARD: wall mounted, single door
 CUPBOARD: under bench, single door
 MULTIFUNCTION DEVICE: printer/copier/scanner/fax, desktop
 MULTIFUNCTION DEVICE: printer/copier/scanner/fax, floor standing

GPO, DATA and MEDICAL GASES OUTLETS have location-specific codes and descriptors available for them:

GPO: single, emergency power, wall mounted
 OUTLET: data, double RJ45, on services panel
 OUTLET: oxygen (O2), on services pendant

Finishes details

The AusHFG item control schedule includes a range of room finishes to support the functional specification of Standard Components. The details of each finish, which in the previous naming system were provided in separate fields, are included in the item name as illustrated below:

FLOOR FINISH: carpet tiles
 WALL FINISH: paint, acrylic, washable
 CEILING: plasterboard, flush set, suspended, paint, scrub resistant

For FFE items, the AusHFG item library does not typically describe finishes or materials. There are however some exceptions to this, which include shelving, bench top units and noticeboards. The material finish of these items is specified the AusHFG in order to ensure a minimum performance criteria can be achieved. Where items include a material specification, the material is listed at the end of the item.

This example shows a selection of items for 750mm deep bench tops:

BENCH: 750D, laminate
 BENCH: 750D, stainless steel
 BENCH: 750D, stainless steel lipped
 BENCH: 750D, solid surface

USING THE AUSHFG DOCUMENTATION CONVENTIONS FOR PROJECTS

It is acknowledged that the AusHFG item coding and naming systems are often used in parallel to project teams' own systems, and that the architect's coding and naming system can be the one presented to clinical users during design.

It is hoped the Item Control Schedule will support teams in managing documentation across the AusHFG and in-house systems.

Teams are encouraged to be innovative in designing their documentation processes. They should not feel obligated to replicate techniques or formats used in the AusHFG documentation and project resources, if more efficient and user-friendly techniques are available and are supported by the client.

For teams which choose to use the AusHFG coding and naming systems in their project documentation, the following paragraphs provide some suggested additional guidance and points to consider.

Adding further detail to items - parent and child

To allow for the expansion of generically briefed AusHFG items to include further detail generated during design, teams choosing to use the AusHFG coding and naming conventions may consider the use of 'parent and child' item relationships. Using this system, an AusHFG item can be considered a 'parent' for which 'child' items can be created. Each of the child items inherit all the attributes and functions assigned to the parent, but is additionally differentiated.
